

SMART RESTART™ Installation, Activation, and Registration

Introduction:

This document covers the steps for installing SMART RESTART™, activating your SMART RESTART™ installation with your license key, and registering online for free phone support.

Requirements:

- ◆ **A working internet connection**
- ◆ **The SMART RESTART™ installation CD or the installer (*SRInstall.exe*)**
- ◆ **Your SMART RESTART™ license key**

Steps for Installation:

1. Run the installer.

If you downloaded the SMART RESTART™ installation, you can run it by double-clicking *SRInstall.exe*. If you have the SMART RESTART™ CD, insert the CD into your CD-ROM drive and choose Install SMART RESTART™.

2. Click “Next” at the welcome screen.

3. Read the license agreement, choose “I accept the terms of the license agreement”, and click “Next”.

4. Create a password.

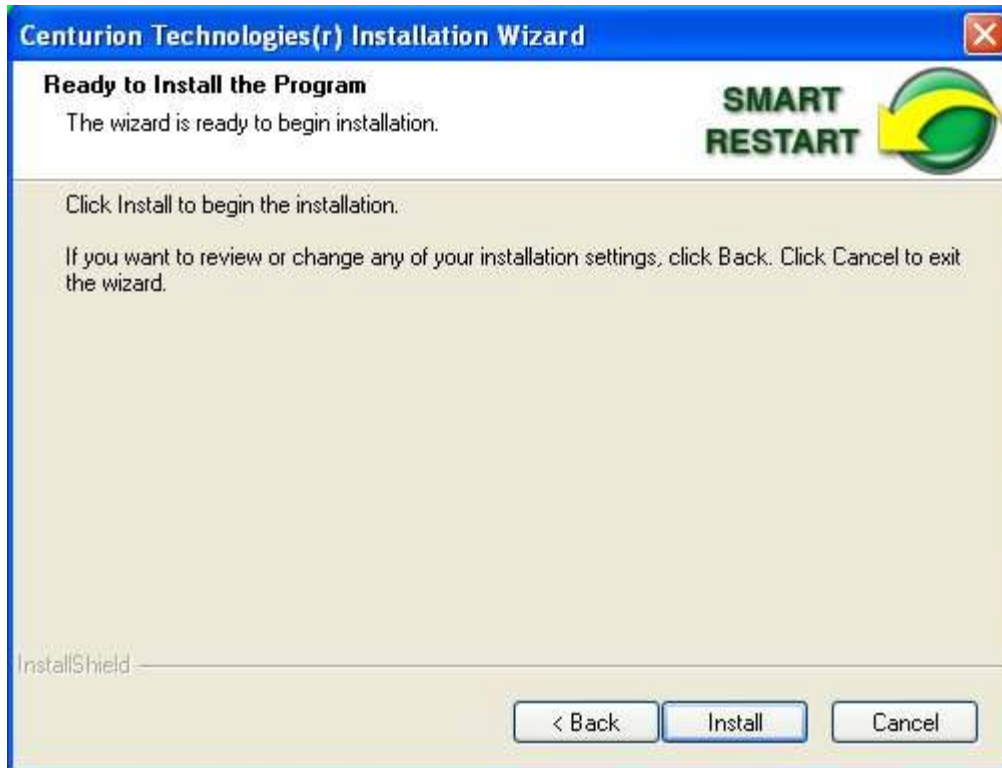

The password you create will be used to disable the SMART RESTART™ protection and make configuration changes.

IMPORTANT WARNING: Remember your password. You will be unable to make changes to SMART RESTART™ without your password. As a part of the SMART RESTART™ design your password is known only to you, please write it down and store it in a safe place. THERE IS NO RECOVERY MECHANISM FOR FORGOTTEN PASSWORDS and Centurion Technologies does not store passwords.

The screenshot shows a Windows-style dialog box titled "Centurion Technologies(r) Installation Wizard". The main heading is "Create Password". In the top right corner, there is a logo for "SMART RESTART" which consists of the text "SMART RESTART" in green and black, next to a circular icon with a yellow arrow pointing clockwise. Below the heading, there is a block of text: "IMPORTANT WARNING: Remember your password! You will be unable to make changes to SMART RESTART without your password. As a part of the SMART RESTART design, your password is known only to you. Please write it down and store it in a safe place. THERE IS NO RECOVERY MECHANISM FOR FORGOTTEN PASSWORDS and Centurion Technologies does not store passwords." Below this text are two text input fields. The first is labeled "Enter Password:" and contains the text "mypassword". The second is labeled "Verify Password:" and also contains "mypassword". Below the input fields is a checkbox labeled "Show password" which is checked. A note below the checkbox states: "Note: Passwords must be at least six characters in length." At the bottom of the dialog box, there are three buttons: "< Back", "Next >", and "Cancel". The text "InstallShield" is visible in the bottom left corner of the dialog box.

5. Click "Install" to begin the installation.

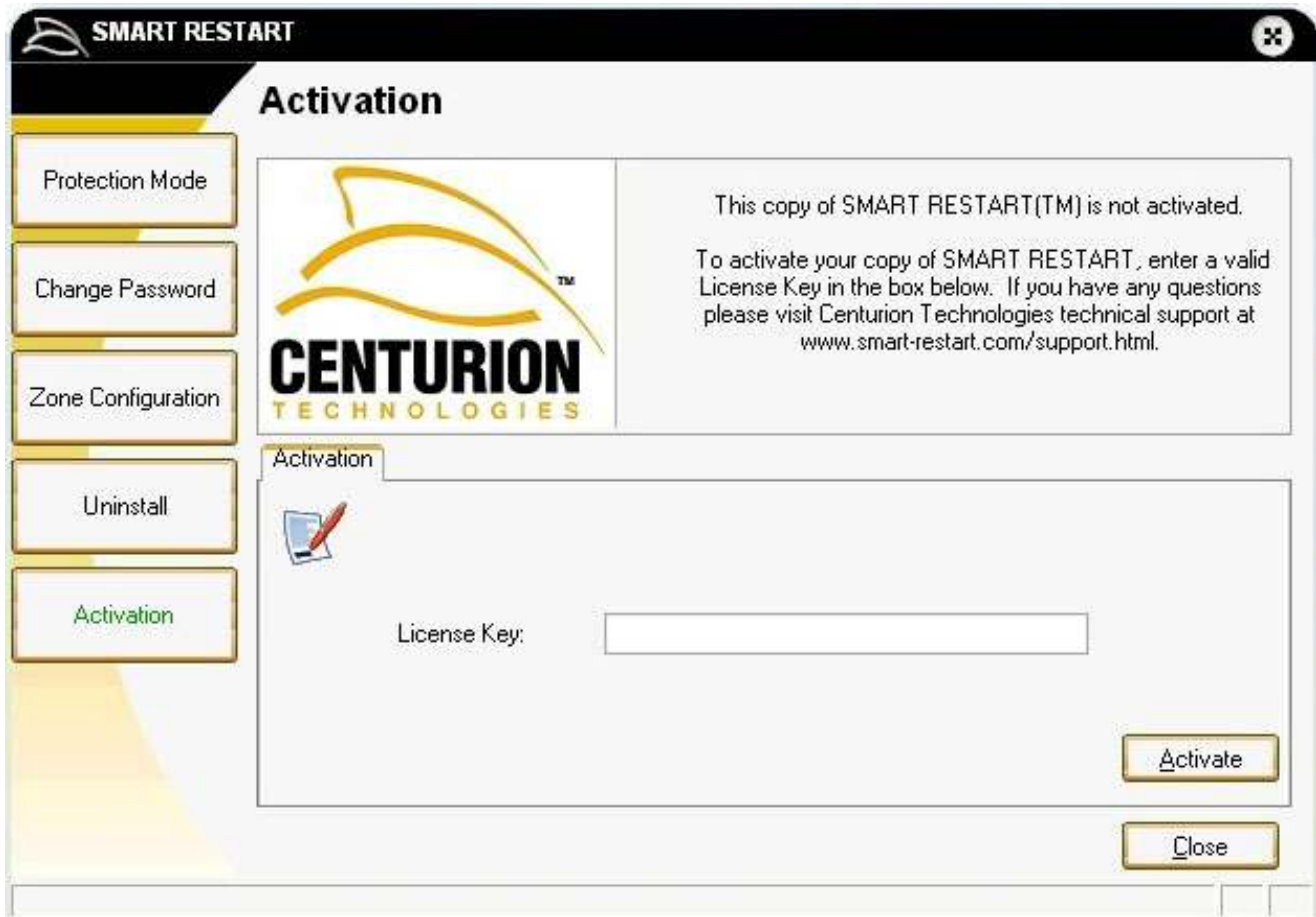

6. Click "Finish" to reboot your computer and complete the installation.

Steps for Activation:

1. Enter your license key into the SMART RESTART™ application.

Once SMART RESTART™ is successfully installed, you must “activate” the software. This is done by entering the License Key found on the sticker on the front of the CD sleeve into the License Key field on the Activation screen. This screen is shown below.

Activation requires an Internet connection. If you do not have an Internet connection you will be unable to activate SMART RESTART™. Once SMART RESTART™ is activated on a machine, it cannot be transferred to another machine. However, it can be uninstalled and reinstalled on the same machine.

Steps for Registering Online:

1. Go to the online registration page.

Once SMART RESTART™ is successfully activated, you can receive 30 days of FREE phone support by immediately registering your customer information with Centurion Technologies. You can do this at www.smart-restart.com/registration.

2. Locate your SMART RESTART™ license key.

You will need your valid license key used during the activation process. The license key sticker is on the CD sleeve. You can also find the license key by right-clicking on the SMART RESTART™ icon in the system tray in the bottom right hand corner of your screen and selecting “About” from the menu. The license key will be displayed as shown below.

3. Fill out the registration form on the website.

To register, simply enter in your Name, Email Address, License Key, and all other additional information and click the “Submit” button. You will then be shown a message telling you that your information has successfully been registered.
